

**HOW TO CALCULATE NATURAL GAS BILLS  
(Washington)**

Effective: 4/1/24

**Calculating, or Estimating, Your Monthly Natural Gas Bill**

1. Find, or estimate, the number of therms you used for the billing month.  
(Your bill shows them under "metering information.")
2. Find the appropriate rate schedule below.  
(Your bill identifies the rate schedule each meter is billed under.)
3. Compute the charges for your gas usage, or estimated usage, by following the steps outlined for the appropriate rate schedule.  
(For your convenience, the energy charges include the effect of Schedules 150, 155, 161, 162, 166, 175, 178, 191, & 192.)

*Note: For purposes of calculating the cost and credit associated with Schedule 162, Climate Commitment Act, the calculations below are applicable to premises that were connected to the system prior to 7/26/2021 and therefore receive a credit. Those connected on or after 7/26/2021 are not eligible to receive a credit in accordance with the Climate Commitment Act.*

4. Calculate and add any franchise fees that you may have to pay for your gas usage.  
(The various franchise fees are identified below, as well as on your monthly bill.)

**Computing Your Natural Gas Therm Usage**

- \* Subtract your previous meter reading from your present meter reading.
- \* Multiply the difference by the multifactor shown for your meter and round to the nearest whole number.  
(This is your natural gas therm usage for the period.)
- \* Compute the charges by using the rate schedule shown on your bill, or an example shown below.

**Explanation of Terms**

**Basic Charge:**

Customers billed under some rate schedules are charged a fee which helps to pay the basic costs which are a natural part of keeping gas available to all our customers. Examples include meter reading and billing costs and the cost of maintaining company equipment on the customer's premises. The basic charge is added into the total charge for your use.

**Minimum Charge:**

If a rate schedule lists a minimum charge we will bill at least that amount each month, even if the actual charges for your use were less than that amount. The minimum charge, like the basic charge, is designed to help pay basic costs of keeping gas available to our customers.

**Therms:**

Your use of gas is billed in units called therms. One therm equals the heating capacity of approximately 100,000 matches.

**Multifactor:**

Your gas meter measures gas in cubic feet. The heating capacity of a cubic foot of gas varies depending on what source Avista Corporation gets it from. In order to bill our customers only for the heating capacity that the gas provides, we use a multifactor to convert cubic feet into therms. The multifactor varies with differences in the grade of gas we can provide our customers.

**RATE SCHEDULES**

Customers served under Schedules 101 and 111 are eligible for service under either Schedule. If you take service under either of these Schedules, and you believe your bill would be considerably less by taking service under the other Schedule for an entire year, please contact one of our customer service representatives at the office shown on your bill.

Rate Schedules 112, 131, 132, 146, and 148 are available, under contract, to large and extra-large gas customers. They are not explained here because of their limited application.
