

**Be alert to
invisible
carbon
monoxide.**

AVISTA[®]

**Purchase and install
a carbon monoxide
detector today.**

When natural gas isn't burned properly, say, because of a faulty furnace, it can emit carbon monoxide (CO), a colorless, odorless gas that can cause flu-like symptoms and even death. Be alerted when CO is present. Install a UL-listed carbon monoxide detector. **We just want you to be safe.**
