

October 1, 2019

Dear Vendor:

Avista recently completed our annual evaluation of energy savings, market costs and other considerations associated with our **Commercial Energy Efficiency programs**. This analysis resulted in some changes to incentive amounts and includes measure discontinuations and additions. The new commercial Agreement forms will be made available online prior to **January 1, 2020** when the changes go into effect. Prescriptive measures must be installed and operating; an Avista agreement form, final invoices and other required documentation must be submitted and postmarked to Avista no later than **December 31, 2019**. Any applications submitted after this date will receive the revised 2020 offerings, if applicable.

Please see the attachments for measure level detail or go to <https://www.myavista.com/bizrebates>.

We would also like to introduce the new and enhanced **Avista Trade Ally Network**. This new program was designed for you, an Avista Trade Ally, to help you identify opportunities for energy efficiency, sign up for training opportunities, and connect customers with our programs. The Avista Trade Ally Network is our primary tool for providing program updates so be sure you have access! We have a new log in process so if you have not received your unique log in code, please email AvistaTradeAlly@avistacorp.com for more information on how to join.

Multifamily Natural Gas Market Transformation (WA and ID). New construction multifamily dwellings (five units or larger) that install gas heat as the main heat source, in lieu of electric heat, qualify for a \$3,000 per unit rebate. This program will be discontinued in Washington (only) on December 31, 2019. The program will continue in Idaho in 2020 and will only be available via our custom or Site Specific process. For more information, please contact Sue Baldwin at Sue.Baldwin@avistacorp.com or (208) 769-1340.

Updates regarding Avista's **Residential Energy Efficiency programs** will be announced at a later date. Please contact Camille Martin at Camille.Martin@avistacorp.com or (509) 495-4276 for more information.

Thank you in advance for your support of Avista's Energy Efficiency programs,

Rachelle Humphrey – Commercial Lighting Program Manager
