

A close-up photograph of a person's hand holding a white electric vehicle (EV) charging plug. The plug is being held near the charging port of a vehicle, which is partially visible in the background. The background is slightly blurred, showing the metallic and plastic components of the car's charging area. The overall lighting is bright, suggesting an outdoor setting.

people in
electric vehicles

AVISTA[®]

Get a free EV charger.

If you own an electric vehicle (EV), and you're an Avista electric customer in Washington, you may be eligible to get a free level-2 charging system at home (up to \$1,000 reimbursed for cost and installation). Participating customers are only required to respond to occasional surveys, controlled charging tests, and collection of charger data.

Avista is also seeking locations in Washington to install public and workplace level-2 charging stations.

If you're interested in a free home charger, or have a location suggestion, please email us at electrictransportation@avistacorp.com.
