

A close-up photograph of a person's hand holding a white and grey electric vehicle (EV) charging cable connector. The hand is positioned in the center-left of the frame, with the thumb and index finger gripping the handle. The background is a blurred view of the car's charging port area, showing the dark plastic housing and some internal components. The lighting is bright, suggesting an outdoor setting. A semi-transparent green rectangular box is overlaid on the right side of the image, containing white text. In the bottom right corner, there is a dark blue rectangular box containing the Avista logo.

people in
electric vehicles

AVISTA[®]

Get an EV charger.

If you own an electric vehicle (EV), and you're an Avista electric customer in Washington, you may be eligible to get a level-2 charging system at home (up to \$1,000 reimbursed for cost and installation). Participating customers are only required to respond to occasional surveys, controlled charging tests, and collection of charger data.

Avista is also seeking locations in Washington to install public and workplace level-2 charging stations.

If you're interested in a home charger, or have a location suggestion, please email us at electrictransportation@avistacorp.com.
